DETAILED ACTION

Claim 2 is pending.

Applicant's election without traverse of Group II (instant claim 2) in the reply filed on January 5, 2011 is acknowledged.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by Rideout et al (U.S. Patent 6,436,933 with a filing date of March 26, 2001).

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Art Unit: 1628

Rideout teaches compounds 1-40 (Figures 1A, 1B and claims 1-3) are useful in the inhibition of anthrax lethal factor thereby treating anthrax infection (abstract).

Conclusion

Claim 2 is rejected.

No claims are allowed.
